## EXPERIENCE

### IT Manager

#### CL Granada

April 2024 – Ongoing    Granada

- Automated key administrative workflows using Python scripts, reducing manual workload and improving operational efficiency.
- Developed and fine-tuned internal web platforms, enhancing UX and performance.
- Optimized IT infrastructure by implementing cloud-based solutions, improving scalability and security.

### FrontEnd Developer

#### Grupo Trevenque

March 2022 – June 2022    Granada

- Customized advanced website templates to precisely match each client's brand identity, including color schemes, logos, and layouts.
- Resolved front-end design issues and optimized responsiveness, ensuring a seamless user experience.
- Developed and optimized front-end modules to enhance functionality, improving overall project efficiency.
- Oversaw the full deployment process, guaranteeing smooth, error-free releases for multiple client websites.

## PROJECTS

### Infrastructure Upgrade & Optimization

#### Company IT Investment | Budget Implementation

- Designed and executed a company-wide hardware and software upgrade plan to enhance client-facing operations.
- Ensured optimal performance, scalability, and cost-efficiency through strategic procurement and deployment.

### Cloud-Based Workflow Transformation

#### Enterprise Collaboration Enhancement | Google Drive Integration

- Led the migration to a standardized, cloud-driven workflow, improving scalability and team collaboration.
- Implemented best practices for data management, security, and seamless cross-team access.
